

ENCLOSURES & TUNING KNOBS FOR MEDICAL EQUIPMENT

OKW
GEHÄUSE
SYSTEME

**CARRYTEC**

CARRYTEC is unique in offering an integrated handle for many different tasks in medical applications. Other advantages include a flat front panel for large user interfaces, the option of mounting the enclosure on a tripod or support arm system, a protected underside area for connectors/switches and a wide range of accessories.

INNOVATIVE TECHNOLOGY FOR LIFE

Ergonomic shapes and surfaces that are pleasant to touch and cytotoxically safe are important – particularly when close contact with people is required.

OKW enclosures ensure your products look dependable, reliable and high value. The areas of application are diverse and range from wireless or wired remote controls, emergency systems, monitoring and signaling devices, through portable solutions for personal protection systems (AAL systems), analysis, diagnostics and therapy equipment, monitoring systems and IoT, to peripheral devices and data acquisition in the laboratory and in research, and much more.

We always offer creative solutions with plenty of scope for your individual product.

INTERFACE-TERMINAL

INTERFACE-TERMINAL cases can be used in a variety of ways: handheld, with an optional docking station, as a desktop unit or as a wall-mounted enclosure, each in 3 sizes and in different heights.

SMART-TERMINAL

Extruded aluminium enclosure with plenty of space for large-volume installations. Individual profile lengths on request.

EVOTEC

A wide range of enclosures for contemporary desktop applications. Robust design with a flat top part or as a desktop version with an ergonomically inclined operating panel.

PROTEC

Versatile desktop and wall-mounted enclosure with an ergonomic operating panel.

MINITEC

Two enclosure designs and easy to wear, e.g. on a neck lanyard, on a wrist strap, on a belt or on a key ring.

CONNECT

Ideal for wire connected devices. Snap-together enclosure with smooth convex side and a recessed side for a membrane keypad.

SLIM-CASE

Modern handheld enclosure with a slim design, ideal for the installation of large displays and touch screens up to 4".

FOR MORE COMFORT IN MEDICINE, IN THE LABORATORY AND HEALTH CARE

The OKW range of plastic enclosures covers many different applications, for example handheld enclosures, wall mount enclosures, desktop enclosures, tabletop enclosures, instrument enclosures etc. Choose the enclosure whose design, size and configuration best meets your particular requirements. Modern electronics packaging by OKW is characterised by ergonomic design, user-oriented functionality and high-quality moulding and finishes.

With all conceivable technologies available in-house, we can finish and process the plastic enclosures and adapt them to your requirements.

SYNERGY

Versatile enclosure range made of aluminium and plastic for design-oriented desktop applications.

SOFT-CASE

4 handy sizes, optionally with intermediate ring for more installation height in different designs/colours.

COMTEC

Desktop enclosure with its front panel ergonomically inclined at 10°, a real asset when operating and reading.

MEDITEC

Large-volume enclosure system with an elegant design; high degree of stability and a wide range of options, e.g. handles, sloping control panels, side panels for more installation height, etc.

STANDARD ENCLOSURES PROVIDE A WIDE RANGE OF SUPPORT

Even our standard enclosures offer innovative and practical design features and compatibility. These include solutions for the power supply, the installation of standardised displays, high protection classes, high-quality and easy-to-clean materials, recessed surfaces for the protection of membrane keypads and displays, as well as recessed surfaces for interfaces, etc. A wide range of accessories allows you to provide the enclosures with additional functions.

STYLE-CASE

Handheld enclosure with a contoured design; guarantees safe and fatigue-free operation.

OPERATING ELEMENTS FOR MEDICAL SYSTEMS

OKW Gehäusesysteme has a wide range of modern tuning knobs for operating medical equipment, e.g. for ventilators, emergency systems, analysis, diagnostics and therapy equipment, medical IoT and for tracking and monitoring systems.

Our latest operating elements combine special technical features with a contemporary appearance. This includes optional LED illumination, flush-fitting installation, a main body which is slightly inclined towards the internal axis, function-oriented marking elements, modern colour selection etc.

8

STAR-KNOBS

Our STAR-KNOBS are designed for menu driven interfaces, click rotation and click push-in for 'OK'. This reduces the number of knobs and controls required on the front panel. The illumination is a visual highlight and enhances user operation of the equipment.

CONTROL-KNOBS

New ergonomic CONTROL-KNOBS have a soft-touch surface which is easy to grip and feels comfortable in operation. The high-quality appearance – illuminated if required – distinguishes this advanced range of tuning knobs as the central element of menu-driven interfaces.

TOP-KNOBS

TOP-KNOBS are the ideal solution for lateral screw fixing or for mounting on spindles. The lateral fixing screw is innovatively concealed by functional marking elements in different colours and shapes.

COM-KNOBS

The COM-KNOBS range of tuning knob supports the appearance of modern medical applications. Safe operation is ensured by means of a collet fixture for electromechanical rotary potentiometers with round shaft ends in accordance with DIN 41 591.

INDIVIDUALISATION ACCORDING TO YOUR VERY OWN WISHES

Look at our comprehensive standard range and select the enclosure or tuning knob that best matches your ideas, your components and the needs of your customers. In the next step you merely have to tell us what you still need for your own product. Together with you we choose the necessary modifications – ideal in terms of price, quality and delivery time – to meet your specific requirements.

BODY-CASE

OKW's BODY-CASE is the new fully "wearable" standard plastic enclosure. The design is perfect for so-called "wearable technologies": on your arm, around your neck, clipped to a shirt or trouser pocket, or carried loose in an article of clothing.

CUSTOMISING

PRINTING

You can use printing on your product to give it a personal touch. It is also possible to indicate the function and usage. With precision craftsmanship, we can carry out the required printing to your satisfaction. Depending on the printing format and type of enclosure, we can offer you screen printing, tampo printing as well as digital printing.

LASER MARKING

Laser marking is ideal for individual labelling, identifying or marking. In particular, very small machine-readable markings, e.g. QR codes, barcodes, DataMatrix codes, consecutive numbering of individual parts and individual texts/logos can be carried out quickly and easily with laser marking.

EMC SHIELDING

When it is a question of EMC and the protection of your electronics from external interference as well as increased internal emission noise, OKW Gehäuseysteme is your competent partner. To shield plastic parts, which offer no natural protection against electromagnetic radiation, we coat the inside of the enclosure with aluminium.

SPECIAL MATERIAL

SPECIAL MATERIAL "INDIVIDUAL COLOURS"
On request we can also produce many of our enclosures and tuning knobs in special colours. To match the colour you require, we can have the natural plastic material coloured and extruded to a high standard of reproduction. Individual colour adjustments are possible according to a sample, RAL or Pantone.

SPECIAL MATERIAL "V-0"
Manufacturing of enclosures in flame-resistant plastic material on request.

MACHINING

We can perform individual machining processes for you, quickly and reliably, for sample or series production quantities. You receive your enclosures ready-to-use, and only have to install the electronics.

Milling, tapping, engraving, drilling, countersinking and stamping - there is practically no limit to the variety of shapes and designs

LACQUERING

We can lacquer the enclosures and tuning knobs in any colour you wish so that it matches your application or your company CI. For special requirements, such as for improving the feel of your product, for metallic effects or for protection from electrostatic discharge, OKW offers a wide choice of lacquers.

PRODUCT LABELS

For lettering and colour design, we can digitally print product labels quickly and easily for small batches starting with 1 unit. The digital printing process allows different versions without a great deal of trouble, e.g. in design, with consecutive numbering, codes and technical specifications. Colour gradations are also possible.

ASSEMBLY OF ACCESSORIES

We take over for you the assembly of enclosure accessories, e.g. cable glands, belt/pocket, tilt foot bars, wall-mount kits, hinges, handle bars and the application of keyboard foils, product labels, type plates, display windows, mounting pillars etc. Also assembly and packaging to customer's specifications, e.g. seals, fibre optics etc.

In order to be able to meet your requirements at all times, we maintain a large stock of over 3,000 standard products. We have a global logistics network, our products are "Made in Germany", and we offer you a long-term sales guarantee for standard enclosures and tuning knobs.

RELAXED IN ALL PROJECT PHASES

With us as your competent partner, you can look forward to your next project with complete confidence. We can advise and support you with all of our standards, our knowledge and all of our customisation options.

We are one of the leading manufacturers worldwide in enclosure and tuning knob technology. OKW products are always characterised by a high level of functionality and innovation, aesthetic design, a high degree of ergonomics and quality of finish, as well as tailor-made services according to your individual wishes.
