## Universal plastic enclosures

Our TOPTEC enclosures allow pre-assembled PCBs with protruding connectors and interfaces to be mounted directly into the case. It is no longer necessary to wire in the connectors after fitting the PCB into the enclosure - an excellent advantage.

- modern aesthetic design for indoor applications as desktop or wall mounted systems as well as DIN rail mounted devices
- simple and secure snap-together case assembly
- for security, a tool is required to open the case
- base part with lateral opening for quick and easy equipping from all sides
- clip-in end panels allow PCBs, pre-fitted with connectors, to fit straight in
- extensive range of 28 models
- type F with flat top molding
- type H with high top molding
- versions with or without ventilation slots
- ventilation slots can also be used for gas detection and sound
- discreet wall mounting facility; the hidden wall suspension element, with fast release tab, snaps into apertures on the underside of the base
- optional DIN rail mounting clip
- protection class IP 40
- recess in top for a membrane keypad or label
- internal screw pillars for PCBs etc.

## Applications and Examples

Universal enclosures for electronic and electro-technical devices. For example

- Monitoring purposes as check instruments
- Signalling equipment
- Control systems
- Medical and wellness devices
- Laboratory technology
- Computer peripherals
- IoT/IIoT

Adaptive multicontroller for single sensors

IR-Controlbox

MPI adapter

PROFIBUS radio system

## View Customizing Options

What do you still need for your own very personal product? We can supply enclosures and tuning knobs with all necessary modifications for fitting your electronic components. Customizing options for Topotec
